## Telford (01952) 793050

**Microsoft** Partner

### Customer Reviews

#### YELL

[GeorgeW-70](#) 13 Jan 2017

I have used this company three times and each time have had my problem solved quickly and was charged a sensible price. Twice was with different desktop computers and once with a laptop that needed upgrades which I found complicated. I dropped the laptop off around lunchtime and collected it that evening. I found the engineer friendly and knowledgeable.

#### Google

**Phil Nock** (Google); Same day service and no hidden charges. Great service

**kally dhillon** (Google)

Genner Communications are an exceptionally good company to do business with. We have used them several times to sort out our company's computer problems and wouldn't ever use anyone else. They are professional, efficient, reliable and good value

my laptop was fixed quickly, antivirus put on it and all my pictures from sons birth recovered, can't praise Genner Communications enough

Please Note

[A&A Computers Telford](#) is owned by Kevin Genner of [Genner Communications](#). Also, the vast majority of repairs and upgrades are performed by Kevin. The following certificates and letters therefore relate directly to Kevin.

### Sample letters

Kevin,

Just a quick note to say a huge thanks for your help on the disk drive. Above and beyond the normal confines of your job I might add.

Great service once again from Dataworld and a deserving drink coming your way courtesy of myself when I am down next or if I see Emlyn first and get him to do it.

I particularly like the outside of office hours technical helpline I had.

All joking aside Thanks again Kev.

Regards,

Euan Kerr  
Corporate Account Manager  
SCC

Please note

As can be seen from the above, we are highly regarded and have considerable expertise in the fields of computer repair, data retrieval, data transfer, computer protection and security and support.

We are also specialists in finding – removing malware and upgrading from Hard Disk Drive to SSD with data transfer (including upgrading to a smaller capacity SSD).

Yours; Kevin Genner
